DETAILED ACTION

Allowable Subject Matter

1. Claims 1-8 are allowed.
2. The following is an examiner's statement of reasons for allowance: Applicant's independent claim 1 is allowed over the prior art of record because none teach or render obvious a method for fabricating a shallow trench isolation, comprising the steps of anodizing the isolation region to form a porous silicon and to form an air gap in the porous silicon, wherein a porosity of the porous silicon is determined by the dose of the implanted ion.
3. See Lim et al. US Patent 6,406,975 where Lim teaches forming an air gap within the shallow trench (STI) region where a cap layer is used to as an porous layer where the filler material is subjected to a plasma and heated to vaporize the filler material so that the material diffuses through the cap layer, however, fails the step of performing ion implanting process into the silicon substrate and anodizing the isolation region to form a porous silicon and to form an air gap in the porous silicon.
4. All dependent claims are also rendered allowable.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
